Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Conclusion

1. This application is in condition for allowance except for the following formal matters:

Claim Objections

2. Claims 16 and 20 are objected to because of the following informalities. Claim 16 recites “an opening” in lines 3 and 4. Are these different opening since both are a part of the toner supply container. Claim 16 also recites non-idiomatic English in lines 25 and 34-35. Finally, claim 16, line 37 recites “in the first position” as opposed to “to the first position”.

Claim 20 recites a second gear receiving a driving force from the toner supply container. Is this intended?

Appropriate correction is required.

3. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

4. Claims 16-20 are allowed. These claim recite a toner supply container detachably mountable to an image forming apparatus, said toner supply container comprising: a container body for containing toner; said container having an opening; a shutter for closing and opening an opening; a first gear portion provided in the shutter; a rotatable member manually rotatable in the first or second and opposite directions; a second gear portion provided in the rotatable member;

wherein by a mounting operation of the toner supply container to the image forming apparatus, said first gear portion and said first gear member are engaged with each other, and said second gear portion and said second gear member are engaged with each other, to establish a drive transmission path from said movable member to said shutter member, wherein said movable member takes a first position when said second gear portion and said second gear member are engaged with each other in the mounting operation, and said movable member takes a second position with which said shutter member takes a most open position.

Prior Art of Record

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nagashiro (2004/0131391A1) teaches a toner supply container having a shutter.
